**Question:** What billing software does the City currently use? Also, are we locked into any type of contract with the software provider?

**Answer:** The City currently uses ASI software located in Greenville, SC. We have a yearly contract.

**Question:** What types of meters does our system utilize? Are we still working on installing more radio read meters?

**Answer:** The City uses Neptune meters. We currently have installed them in 75% of the locations, and have purchased enough meters to complete the installation. The installation of the remaining 25% is ongoing.
